

INFORMATION TECHNOLOGY SERVICES

With the increased dependency on technology, healthcare practices need reliable, scalable and secure IT solutions. Adjuvant.Health's Technology Services Team brings enterprise technological capabilities to practices of all sizes and specialties. You receive the same services of a dedicated internal IT Team, but with the added benefit of expertise to help your practice with the latest hardware, software and up-to-date security technologies.

Why Adjuvant.Health's Technology Services Team?

- 🔗 Our Clinical Applications Team assists with training, functional support, implementation and EMR optimization to help deliver the highest quality care.
- 🔗 Our Security Services Team conducts detailed Security Risk Assessments to ensure that your practice is not only HIPAA Compliant, but that all of your data is secure by helping you create a robust Cyber Security Program.
- 🔗 Our Technology Leadership Team will help bridge the gap between today and tomorrow's needs and help you build a cost-effective technology strategy.
- 🔗 Our Infrastructure Team can build a detailed Disaster Recovery Plan to ensure that your data and systems will always be available.
- 🔗 We can assist with the purchase, configuration, deployment, maintenance and management of all technology in your practice.
- 🔗 Our Help Desk Team can provide day-to-day technical support.
